

Flotilla 6-5

Boat Crew Operations

On this September occasion of Initial Coxswain Check-Ride, 9(!) Auxilliarists in 2 boats came out to support Coxswain Trainee Fletcher. USCG Station Menemsha sent BM2 Behr to observe and sign off on the demonstrated stern and side towing. BM2 Behr called the US Army Corps of Engineers manning the dyke on arrival in NB Harbor and held up the dyke closure until the training was complete!

Coxswain and boat crew trainees benefited from a joint training exercise on July 16 when Menemsha brought over their *new* 24' boat so both parties could practice towing.
